Focus on high-value work. Leave data management to us.

SOPHiA DDM™ Laboratory Information Management System (LIMS) integration automates data management and increase productivity with no hidden costs. In collaboration with a global service provider, we break projects into manageable phases and work with you to implement a solution that fully meets your requirements.

1. **Streamline lab operations**
   Overcome manual data entry challenges by automatically populating the SOPHiA DDM™ platform with data from a variety of external sources and systems.

2. **Customize to suit your needs**
   Choose a fully customizable solution that adapts to your evolving needs.
   Our team of experts will support you from start to finish, including workflow testing and ongoing optimization.

3. **Maximize your SOPHiA DDM™ experience**
   Connect SOPHiA DDM™ directly to various databases and systems to extract more insights from your data through downstream analysis using industry-standard protocols HL7, FHIR, and others.

Discover what integration can do for your Lab

- **Increase test volume** and reduce the **turnaround time**
- **Save time** with automation and focus on high-value work
- Reduce data entry errors and **scale** your projects with ease
Breaking unique implementation projects into manageable goals
From discovery to go-live in 12-16 weeks*

1. DISCOVERY
Development of a custom migration plan based on your workflows, technical needs, and goals

2. PLANNING
Fine-tuning of project milestones and schedule to fit your timeline and budget

3. BUILDING
Creation of a unique cloud environment, systems upgrade, and preparation of data for production

4. CONNECTING
Mapping and testing of every connection, verification of your configuration, and evaluation of overall connectivity

5. GO-LIVE
Seamless transition to a new cloud-based architecture with minimal operational disruption

12-16 weeks*

About SOPHiA GENETICS
SOPHiA GENETICS (Nasdaq: SOPH) is a healthcare technology company dedicated to establishing the practice of data-driven medicine as the standard of care and for life sciences research. It is the creator of the SOPHiA DDM™ Platform, a cloud-based SaaS platform capable of analyzing data and generating insights from complex multimodal data sets and different diagnostic modalities. The SOPHiA DDM™ Platform and related solutions, products and services are currently used by more than 750 hospital, laboratory, and biopharma institutions globally.

* for indicative purposes only; actual duration may be subject to change depending on the specific systems and requirements of your research lab.
